

Caséta Wireless

App & Integration

The Smart Bridge and App for Caséta

The Smart Bridge and App for Caséta are the perfect foundations for creating a connected home system. Monitor and control lights (as well as shades and temperature) from anywhere, so you can always be in touch with your home.

Personalization

Add personalized scenes to control multiple lights and shades together at the touch of a button. Create a “movie” scene that dims lights and lowers shades as the movie begins. Or create a “goodnight” scene that turns off all your lights and closes shades before you drift off to sleep.

Scheduling

Schedule lights and shades to adjust automatically at set times of day. Turn on your porch light at sunset and turn it off at sunrise. Turn lights on to a soft level and slightly raise shades every morning as you head into the kitchen for coffee.

Geofencing

The geofencing feature controls lights based on your location. Maybe you always leave the entryway lights on as you head out the door in the morning? Geofencing will turn them off for you once you're out the door. It can also turn lights on for you when you come home.

Voice-Activated Convenience

“Alexa, dim the lights.” “Ok Google, all lights out.” “Siri, kitchen lights on!” Caséta integrates seamlessly with Amazon Alexa, Google Assistant and Apple HomeKit to give you hands free control of your lighting. Life just got simpler.

Look like you're at home—even if you're not

The Smart Away feature randomly turns lights on and off during the evening when you're not home. You can manually trigger this feature in the app at your convenience or automatically trigger it if geofencing is turned on. You can also trigger Smart Away using the Nest Home/Away Assist feature.

Control from anywhere

Control lights, shades and temperature in the comfort of your home or from anywhere in the world – the office, the airport, the beach – so lights aren't left on or shades aren't left open when you're away.

Seamless smart integration

Caséta by Lutron works with more leading smart home brands than any other smart lighting system, seamlessly integrating with solutions for voice, audio, temperature control, and more.

Voice Control | Monitoring | Thermostats | Audio | Shades and Fans | Professional Integration | Other

Voice Control

Amazon Alexa

Alexa will get the lights for you. Just say the word.

Apple HomeKit

The Smart Bridge contains Apple HomeKit technology, so you can use Siri® to control your lights, shades, and more!

Google Assistant

Enjoy hands-free control of the lights in your home with the Google Home voice-enabled speaker powered by the Google Assistant.

Apple Watch

Works with the Apple Watch. Control lights, shades and temperature right from your wrist.

Monitoring

Nest Cam

If Nest Cam detects a person in or around your home when you're not there, lights can turn on to make it look like you're home.

Nest Protect smoke + CO alarm

When smoke or CO is detected your lights will turn on and your shades will open automatically to help you find your way.

Thermostats

Carrier Côt and Wi-Fi thermostats

Control the temperature in your home from wherever you are with Carrier Wi-Fi thermostats. Compatible with Carrier Côt thermostat and Comfort™ Series Wi-Fi thermostat.

ecobee Wi-Fi thermostats

Enjoy the right temperature in the rooms you use the most, with the ecobee3 thermostat and remote sensors. Compatible with the ecobee3 HomeKit-enabled thermostat and all other ecobee Wi-Fi thermostats.

Honeywell Wi-Fi thermostats

Choose from a wide variety of thermostat options to control the temperature in your home, from anywhere. Compatible with all Honeywell Wi-Fi thermostats, including Lyric Round and T Series.

Lutron Wireless Thermostat, powered by Honeywell

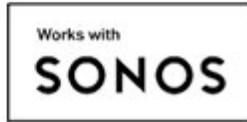

Provided by Lutron, and backed by trusted Honeywell HVAC technology, for temperature and humidity control in one powerful solution. Model L-HWLV2-WIFI.

Nest Learning Thermostat

Adjust the temperature and "Home" or "Away" settings from anywhere. Compatible with all Nest Learning Thermostat models.

Audio

Sonos

Control your lights, shades and Sonos Home Sound System from anywhere.

Shades and Fans

Hunter Ceiling Fans

Adjust the speed and control the light of any Homekit™-enabled ceiling fan from Hunter Fan Company – all from within the Lutron App.

These battery-powered shades are easy to install, they move quietly, and have batteries that lead the industry in battery life. Available in roller or insulating honeycomb styles.

Other

Works with SmartThings

Control lights and shades from the SmartThings app and add more automation to your home.

IFTTT (If This Then That)

Create IFTTT recipes, such as lowering your shades if it's sunny, or turning off lights if the Nest thermostat is set to "Away" mode.

Stringify

Create Stringify Flows that bring together physical and digital things to create powerful experiences, such as dimming the lights, lowering the shades, adjusting the thermostat, and starting a movie activity, all with a button press.

Logitech Harmony

Dim lights, lower shades, and start a movie with one button press on Logitech Harmony hub-based remote controls or from the Harmony app.

works with
XFINITY Home

Works with Xfinity Home

Control your lights from anywhere using the XFINITY Home app.

AT&T Digital Life

Control your lights from anywhere with the AT&T Digital Life app.

Works with Wink

Available at Home Depot and Amazon Control lights and shades, as well as other Wink supported devices.
