

Warm Dim

9W LED A19 3000K - 1800K FILAMENT MILKY WARM DIM

Item# 776400

Ordering Code LED9A19/30K-18K/WMDM/FIL/M

UPC 739698764009

- **SET THE RIGHT MOOD:** Smoothly shifting in color temperature from 3000 kelvin (soft white light) to 1800 kelvin (candlelight), these bulbs are perfect for any room where you want the light to go from bright task lighting to warm, cozy moods.
- **STYLE MEETS FUNCTION:** The classic A19 pear-like shape, E26 base, and milky glass globe of each bulb offers symmetry and a classic design and is wet rated, ideal in indoor or outdoor pendants or portable fixtures like table and floor lamps.
- Fully Dimmable and works with most dimmer switches
- **CLEAN, CRISP COLOR:** Discover authentic hues with our remarkable Color Rendering Index of 90 (CRI90) and light up your living spaces with true-to-life colors, embracing the beauty of natural lighting.
- 5 year Limited Lifetime Warranty

*Maximum Tested (Lamps per Dimmer) - Additional lamps may work with your dimmer system. For maximum capacity please consult dimmer manufacturer.
 †May experience "pop-on", lights cannot be turned on immediately to their minimum level. The slider needs to be raised above the minimum light level for the lights to first turn on if they were initially off. Then, the slider can be lowered to get to a lower light level; the dimmer cannot be turned on to just the minimum level.

Overall Rating	
Not Compatible	One or more of the following observed: Major flickering at various points, significant audible noise, no dimming range, does not turn off.
Bad	One or more of the following observed: Some flickering observed at various points, audible noise may be present, dimming not smooth.
Good	One or more of the following observed: Minor flickering at some point may exist. Dead travel may exist, which means there may be periods of time when the slider (or other form of control button) is moved without affecting the light level. These periods of dead travel are minor and most of the time not visible. Minor audible noise.
Best	Most of the following observed: No flickering, minimal audible noise (typically less than 25 dBA), wide dimming range - can dim down to 20% or less of light output.
High End (H.E.) Dead Travel	Determines how much, if any, dead travel exists at the top and bottom of the dimmer's range. Dead travel is when the slider can be moved without affecting the light level.
Low End (L.E.) Dead Travel
