

IMPORTANT SAFEGUARDS

WARNING - Risk of Electric Shock. Disconnect power at fuse or circuit breaker before installing or servicing.

READ AND FOLLOW ALL SAFETY INSTRUCTIONS

1. It is necessary to remove the socket and install the GU24 whip if fixture doesn't contain a GU24 socket.
2. Not all existing recessed housings that meet these requirements will be compatible with the LR6. To ensure compatibility, a test installation should be conducted.
3. To prevent wiring damage or abrasion, do not expose wiring to the edges of sheet metal or other sharp objects.
4. Install this product only in the compatible housing listed below.
5. Do not make or alter any open holes in an enclosure of wiring or electrical components during installation.

RECESSED HOUSING COMPATIBILITY

- The LR6™ LED Downlight Series is designed to install into any Cree six-inch GU24 base housing and other six-inch recessed downlight housings, converted for use with a GU24 base. For a list of compatible housings, refer to www.cree.com/lighting. If existing recessed housing is provided with an edison based socket then order the GU24 whip, Model GU24 Adapter, from Cree.
- Compatibility of housings not on this list may be determined by measurement of the housing as detailed in the attached drawing (**Figure 1**). To ensure compatibility, a test installation should be completed.

TO INSTALL:

INSTALLATION INSTRUCTIONS

STEP 1:

Remove fixture from the packaging and rotate the "Flip Clips" clockwise until the clips are oriented directly away from the fixture. This position is the "installation ready" position. See **Figure 2**.

STEP 2:

Make sure the power is turned off at the source to the recessed housing(s) that you are installing the fixture(s) in. If installing into Cree housing, skip to STEP 7.

STEP 3:

Once power has been turned off, remove existing trim and CFL, or Incandescent, bulb revealing the existing socket.

STEP 4:

Locate the socket in your existing recessed housing and remove any screws that prevent the socket bracket from being removed. See **Figure 3**.

STEP 5:

Pull socket assembly, including the bracket, as low as possible given the existing wire length available. (May require socket plate removal) Remove any excess bracketry from socket. See **Figure 4**.

STEP 6:

Once you have removed the excess bracketry from the socket, you are now ready to install the LR6 fixture. See **Figure 5**.

STEP 7:

For Edison Connection:

Attach LR6 to recessed housing socket. Screw LR6 into the socket by turning clockwise.

For GU24 Connections (Figure 8):

Attach GU24 socket to the LR6 by inserting pins into the socket and twist socket clockwise until locked. See **Figure 6**.

For Edison to GU24 Conversion:

Converting an existing socket from an Edison-style socket to a GU24-style socket:

- Cut socket wires close to existing Edison-style socket.
- Insert the input wires into the Insulation Displacement Connectors provided on the metal U-connector until flush with the top of the plastic insulator. See **Figure 9**.
- Close plastic hinged cover and snap lock. See **Figure 9**.
- Place "Original Luminaire Modification Marking" label inside recessed housing adjacent to existing relamp label.
- Go to "For GU24 Connection" section.

STEP 8:

Slide LR6 with clips, in ready position, up into the recessed housing until trim ring is flush with ceiling. See **Figure 7**.

STEP 9:

Rotate LR6 Fixture 1/4 turn clockwise to lock clips into position. Your LR6 fixture should now be securely installed into the ceiling. Turn power on and enjoy. See **Figure 10**.

REMOVAL OF LR6 SERIES

NOTE: Make sure power to fixture is removed before attempting to disconnect LR6 module from fixture.

STEP 1:

To remove LR6 module, grip firmly on the trim ring and rotate 1/4 turn counterclockwise to unlock clips from recessed can.

STEP 2:

Continue to turn counterclockwise as you pull downward on the LR6. This will disengage the clips allowing the LR6 to pull free.

STEP 3:

Detach LR6 from recessed housing socket

NOTE: This device is not intended for use with emergency exit fixtures or emergency exit lights..
