Multiple Choices Exceptional Flexibility

The MULTIFIT downlight family offers multiple product choices providing exceptional flexibility for any space

A Comprehensive Selection Of Fixtures

Flat Round Downlight (MFR)

Your classic downlight, with ½" baffle for glare control and a familiar style, which makes it suitable for any space.

Gimbal Round Downlight (MGR)

An adjustable downlight, for your slope ceiling, wall grazing and highlighting artwork and architectural elements by directing the light where you need it.

Cloud Round Downlight (MCR)

Trimless cloud downlight designed to add side lighting for general area lighting.

Unparalleled Flexibility

The MULTIFIT line has been designed with flexibility in mind. Its multiple features, including SelectKelvin and DualDim technology, make it a perfect companion for any space. From residential to commercial, multifamily to mixed-use buildings, its wide voltage range and multiple dimming options allow for direct mount in new construction or most ambitious remodeling projects with its ultra-shallow design.

The Right CCT For Your Project

Utilizing our SelectKelvin technology, select the CCT before, during, or after installation with just the flip of a switch. The external switch allows you to set the color temperature to 2700/3000/3500/4000/5000K CCT during or even after installation to customize any application and set the right atmosphere for your space.

DualDim Ready For Any Dimming Protocol

All MULTIFIT products are suitable for 120-277V input and feature our DualDim technology allowing the luminaire to be dimmed with either TRIAC/ELV or 0-10V controls. Taking the guesswork out of auditing an existing space and providing optimal flexibility while minimizing un-expected installation issues in the field. Whether your project is residential, commercial, mixed-use, new construction or remodel, MULTIFIT allows you to use one luminaire and simplify all phases of the job from specification to ordering to installation!

Installation Made Easy

MULTIFIT fixtures install directly into the ceiling without the need for an additional J-box or recessed can. All you need is a hole in the ceiling, wire the driver and use the springs action clips to sit the fixture flush and secured in no-time.

The shallow design, along with its IC, Air-tight and Wet Location ratings, allow any MULTIFIT to install virtually anywhere.

A Solution For Any Space

Flat Round Downlight (MFR)

Available in 4” and 6”, from 650lm to 1,850lm. The Flat Round Downlight, with its regressed light source, is ideal for residential and commercial task lighting, as well as common areas where a discrete and glare-free product is required.

Applications

Residential: kitchen, bathrooms, office, living room...

Commercial: boutique, coffee shop, cafeteria, corridors, hair salon, rest area, gyms...

Gimbal Round Downlight (MGR)

Available in 4” and 6”, from 650lm to 850lm. The Gimbal downlight is able to tilt up to 30°. It is recommended for wall grazing, highlighting artwork or simply for slope and an unusual ceiling where you need to direct the light down or toward an object.

Applications

Residential: patios, lobby, attic, stairwell, basement...

Commercial: stairwell, gallery, grocery, hair salon, coffee shop, bars, restaurant...

Cloud Round Downlight (MCR)

Available in 4” and 6”, from 650lm to 1,100lm. The Cloud downlight is a great option for any common area where smooth and optimal general illumination is required.

Applications

Residential: kitchen, bedroom, living room, home cinemas, offices...

Commercial: waiting room, coffee room, corridors, restaurant, hallways, gyms, lockers...
